

Changes to the Summer Deletion of Student Accounts

Please note: There will **NOT** be a deletion of ALL student accounts as in previous years. Students who are continuing will have no suspension of accounts. Any student currently with us who will not be actively enrolled on a course in Prosolution for the following academic year will have their account de-activated. Any student whose account is due to be disabled and wishes to retain this work will need to back it up prior to the 30th August. For continuing students, all Teams/Office 365 data will still be available from the previous year.

After the 30th August all student accounts will have an enforced password change applied so that the next time they log in they will need to change their password from their current password. All students new to the college will automatically have this enforced.

Students in college will be prompted to change their password when they first log on to the PC.

Students outside of college will be prompted to change their password when they use webmail <https://email.wmc.ac.uk> or Office 365

Please reply to student logins with any queries regarding this process.

Regards

Student Logins.
